

COURSE

COVID-19 Employee Health and Safety Training

This course is intended to teach employees how to address COVID-19-specific health and safety issues in the workplace.

Category

Health and Safety

Target Audience

This course is ideal for workers returning to work as businesses resume operations in the wake of the COVID-19 pandemic.

Course Length

33m

Skills

Health and wellness, Injury prevention, Responsibility, Risk management, Safety practices.

Language

English, French

COURSE OVERVIEW

This course covers the measures that workers and leaders should take to prevent the spread of infection, as well as for self-protection and to protect others. The training addresses best practices for specific business activities to help workers mitigate the risk of COVID-19-related health and safety issues as businesses resume operations.

LEARNING OUTCOMES

- Discusses personal protective equipment (PPE), including its importance, different types, proper use, removal, and disposal.
- Explains the use of administrative controls like distancing, physical barriers, and laundering, on shipping and receiving, curbside pick-up, delivery, and in-store shopping.
- Discusses the importance of using contact tracing to record places visited and interactions with others, and how to maintain good mental health, including options for support.

COURSE

WHMIS 2015 Training

This course provides a comprehensive introduction to WHMIS 2015 for all workers.

Category

Health and Safety

Target Audience

This course is intended for anyone who works with hazardous materials and requires training on their proper use and storage in the workplace.

Course Length

39m

Skills

Injury prevention, Materials handling, Recognizing hazards, Risk management, Safety practices

Language

English, French

COURSE OVERVIEW

This course discusses the background to WHMIS 2015, as well as the roles and responsibilities for employers, workers, health and safety committees, and suppliers. It includes the Globally Harmonized System of Classification and Labelling of Chemicals (also known as the GHS) for all jurisdictions. Preventing workplace injuries and illnesses is the focus of this system.

LEARNING OUTCOMES

- Explains what the GHS is and the roles and responsibilities of workplace parties.
- Illustrates the new hazard classes and pictograms, and provides information requirements for safety data sheets and labels.
- Explores where to find additional hazard information through workplace-specific education and training.
